

## Health Advisory

Dear Parent,

The concern regarding the Corona Virus is compelling.

Steps are also being initiated by the school to ensure healthy environment to the students.

- Parents are kindly requested to isolate their child for a minimum period of one week in case they or any member of their family has recently travelled abroad. They need to submit a clean chit of health of their ward from the physician at the end of that week to the school authorities, before the student rejoins.
- Parents are being refrained from sending children to school even if the student has mild flu symptoms.
- The children are being encouraged to strictly follow the handwashing ritual.
- The school staff has been requested to screen themselves for the symptoms regularly.

We seek your cooperation to ensure a safe environment for our students.

Regards,

Director-Principal
